

1 **SECTION 9-35, TEMPORARY TRAFFIC CONTROL MATERIALS**

2 **April 3, 2006**

3 **9-35.2 Construction Signs**

4 The first paragraph is supplemented with the following:

5

6 Post mounted Class A construction signs shall conform to the requirements of this
7 section and additionally shall conform to the requirements stated in section 9-28.

8

9 The second paragraph is revised to read:

10

11 Aluminum sheeting shall be used to fabricate all construction signs. The signs shall
12 have a minimum thickness of 0.080-inches and a maximum thickness of 0.125-inches.

13

14 The first sentence in the fourth paragraph is revised to read:

15

16 The use of plywood, composite, fiberglass reinforced plastic, new fabric rollup signs,
17 and any other previously approved sign materials except aluminum is prohibited. Any
18 sign which otherwise meets the requirements of this section and was purchased prior to
19 July 1, 2004, may be utilized until December 31, 2007. If a fabric sign is used, it shall
20 have been fabricated with Type VI reflective sheeting.
